## Coding Challenges Details

```
Guess the number
import random

guesses_made = 0

name = input('Hello! What is your name?\n')

number = random.randint(1, 20)
print ('Well, {0}, I am thinking of a number between 1 and 20.'.format(name))

while guesses_made < 6:

    guess = int(input('Take a guess: '))

    guesses_made += 1

    if guess < number:
        print ('Your guess is too low.')

    if guess > number:
        print ('Your guess is too high.')
```

```
    if guess == number:
        break

if guess == number:
    print ('Good job, {0}! You guessed my number in {1} guesses!'.format(n
ame, guesses_made))
else:
    print ('Nope. The number I was thinking of was {0}'.format(number))
```

Hello! What is your name?

Kiran

Well, Kiran, I am thinking of a number between 1 and 20.

Take a guess: 5

Your guess is too low.
